

1, Explain behaviour of hub device

- * It's used to connect multiple network devices.
- * It's a layer 1 device.
- * It's a broadcast device.

2, Explain behaviour of switch device

- * Switch is used to connect multiple network devices.
- * It's a layer 2 device.
- * It's a Broadcast device.
- * It contains mac table
- * It acts as Broadcast + unicast

3, Explain behaviour of router device

- * It's used to connect the different network.
- * It's a layer 3 device.
- * It's a unicast device.
- * It contains routing table.
- * Routing table contains list of routes
- * It's used to break the broadcast domain
